

Mataco Training

Mataco, the web-based Business Continuity system from Savant (www.savant.co.uk) was developed and designed in partnership with Merrycon, which offers two in-house training courses for organisations that are implementing the software to support their Business Continuity Management (BCM) programme.

Managers

A half-day training course for Mataco Managers, where the delegates will learn, amongst other things, how to set up and manage:

- Users and roles
- The primary BCM data
- Supporting BCM data
- Their organisation's hierarchy
- Plan sections and Plans
- Threat definitions
- Strategies
- Interactions
- Teams
- Other groups
- Exercise programmes
- Reviews
- Reports

Mataco Managers should be experienced, and preferably qualified, Business Continuity practitioners, with a detailed knowledge and understanding of the BCM process.

Users

A half-day training course for Mataco Users, where the delegates will learn, amongst other things, how to use Mataco to:

- Manage their account
- Maintain the BCM data for which they are responsible
- Create and maintain BC strategies and tactical options
- Assess Threats
- Produce reports
- Review the implementation of BCM
- Create and maintain Plans
- Distribute Plans

Mataco Users should be appropriately trained in the Business Continuity tasks that they need to undertake.

Business Continuity Training

Merrycon's Mataco training courses do **not** provide delegates with training in Business Continuity.

As with all Merrycon's training courses and workshops, Mataco training can be tailored to suit the individual needs of the client.

The price for each of these in-house courses starts at £600 excluding VAT, and depends, amongst other things, on the number of delegates, location, and amount of tailoring required by the client.
